

7 Worst Earthquakes In The History of Mankind

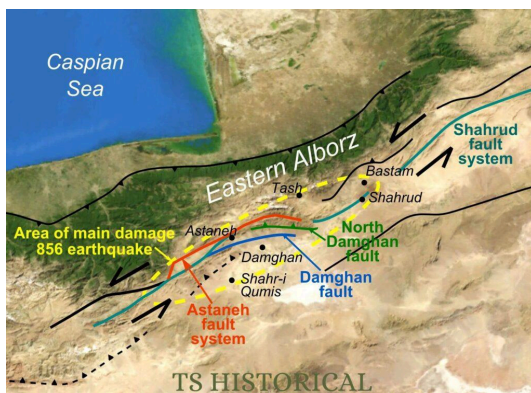

The ground pulsating beneath your feet, the contortions of the earth sending ripples through your flesh. It is a riveting, albeit terrifying experience! Natural catastrophes have wreaked havoc on the planet throughout human history – and even before it. They serve as a humbling reminder of our insignificance in the scheme of things. Here are the seven worst earthquakes in the history of mankind:

1. Antioch Earthquake, Turkey, 115

Antioch Earthquake, Turkey, 115
